

IPsec VPN Security Assessment Report

Executive Summary

This report provides a high-level assessment of the security configuration observed in the analyzed IPsec VPN traffic.

Capture ID	ikev2_sa_test.pcap
Security Score	82 / 100
Risk Level	LOW

Security Findings

Parameter	Status	Finding
Encryption	GOOD	AES-256 strong encryption is being used.
PFS	UNKNOWN	PFS status could not be determined from the captured traffic.
DH Group	GOOD	DH Group 14 provides an acceptable key exchange strength.
Key Lifetime	UNKNOWN	Key lifetime was not observed in the captured traffic.
Replay Protection	UNKNOWN	Replay protection status could not be determined from the capture.
Metadata Exposure	WARNING	VPN traffic metadata may be observable.

Security Recommendations

- Review exposed traffic metadata such as packet timing, sizes, endpoints and flow patterns.
